Re: Exempt Construction and
Operation Status
091-18193-00078

Dear Mr. Hiler:

The application from Kingsbury Casting Division, received on October 1, 2003, has been reviewed. Based on the data submitted and the provisions of 326 IAC 2-1.1-3 (Exemptions), it has been determined that the following changes to the cooling line located at 3232 3rd Road Annex, Kingsbury, Indiana, is classified as exempt from air pollution permit requirements:

- (a) Lengthening the power & free cooling line conveyor to allow castings to cool for a longer period of time.

The OAQ makes this determination based on the following information:

- (1) Kingsbury Casting Division is classified as a minor source for Prevention of Significant Deterioration,
- (2) Kingsbury Casting Division is a FESOP operating source,
- (3) The expansion of the power & free cooling line conveyor is for quality assurance, metallurgical and safety reason,
- (4) The expansion of the power & free cooling line conveyor will not increase the capacity of the melting, pouring, cooling or molding operations and,
- (5) The expansion of the power & free cooling line conveyor will not affect the FESOP operation status of Kingsbury Casting Division.

An application or notification shall be submitted in accordance with 326 IAC 2 to the Office of Air Quality (OAQ) if any of the provisions listed above should change or the source proposes to construct new emission units, modify existing emission units, or otherwise modify the source.

Sincerely,
